

- ✓ Facial ID for medium to large enterprises - time/attendance and secure access control.
- ✓ 1000 base user capacity, (1:N).
- ✓ Multi-authentication - face/pin/card/photo.
- ✓ Fast & accurate, recognition <1 sec, FAR <0.001%.
- ✓ Optional Ok To Wake.

The FaceID range of devices are the world's first embedded facial recognition systems. They provide low cost, fast and accurate face recognition in either standalone or networked configurations.

FaceID brings much higher standards of security than pin codes and cards, and it provides a more hygienic and reliable alternative to fingerprint technology.

The F710X is typically used for access control or for registering time and attendance in the workplace. Companies can integrate this device with existing time & attendance or access control software via the FaceID SDK. As well as increased security, ROI is typically many times the investment cost.

F710X SPECIFICATION

Processor 1 GHz High Speed Digital Processor	Authentication Face, Card, Pin, Photo, combinations possible
Display 3.5 inch TFT colour screen	User capacity 1000 Face Users, 10000 Non-face Users, 1:N
Communication TCP/IP, USB Host, Wiegand output, Push to Server	Record capacity 200,000
Working distance 30cm - 80cm	Certification CE, FCC, Class A ROHS
Security photo 200,000	Lighting 10,000 Lux
Recognition algorithm Dual Sensor V3.0	Access control features Built-in relay
Sensor Specialised dual sensor	Wiegand output User defined output format 26 to 64 bit
RFID Standard EM, optional Mifare	Keyboard 4 x 4 touch keypad
Authentication speed Less than 1 second	Working temperature / humidity 0° - 40°C / 20% - 80%
Performance FAR<0.001% FRR<1%	Size 200 x 95 x 115mm
Attendance features Photo ID, schedule bell, work-status, work code, daylight saving	Weight 505g
Security Relay output	Power 12V DC

SOFTWARE INTEGRATION

As well as integrating with our partner software platform, we provide SDK software at no charge, to enable easy integration with your particular Time & Attendance or Access Control solution.

FACEID PRODUCT RANGE

SMALL TO MEDIUM ENTERPRISES

Enterprise quality face recognition for a smaller user-base.

Models: FA100 - FT200 - FA600

MEDIUM ENTERPRISES

Face recognition for up to 1000 users.

Models: M500 - F710x

MEDIUM TO LARGE ENTERPRISES

High speed face recognition for >2000 users.

Models: F910 - M2000
