

- ✓ Flexible facial ID for larger enterprises - time/attendance and secure access.
- ✓ Wi-Fi enabled.
- ✓ 2000 base face-user capacity (1:N), expandable to 4000.
- ✓ Multi-authentication - face/pin/card/photo.
- ✓ Fast & accurate, recognition <1 sec, FAR <0.001%
- ✓ Optional Ok To Wake.

The FaceID range of devices are the world's first embedded facial recognition systems. They provide low cost, fast and accurate face recognition in either standalone or networked configurations.

FaceID brings much higher standards of security than pin codes and cards, and it provides a more hygienic and reliable alternative to fingerprint technology.

The F910 is typically used for access control or for registering time and attendance in larger enterprises. Companies can integrate this device with existing time & attendance or access control software via the FaceID SDK. As well as increased security, ROI is typically many times the investment cost.

F910 SPECIFICATION

Processor 1 GHz High Speed Digital Processor	Authentication Face, Card, Pin, Photo, combinations possible
Display 3.5 inch TFT colour screen	Attendance features Photo ID, schedule bell, work-status, work code, daylight saving
Communication Wi-Fi, TCP/IP, USB Host, Wiegand output, Optional Wiegand input, Push to server	Security Relay output, Door sensor, Door sensor alarm, Exit button, Removal alarm, Rejection alarm
Working distance 30cm - 80cm	User capacity 2000 Face Users, 10000 non-face Users
Security photo 200,000	Record capacity 200,000
Recognition algorithm Dual Sensor V3.0	Certification CE, FCC, Class A ROHS
Sensor Specialised dual sensor	Lighting 20,000 Lux
RFID Standard EM, optional Mifare	Keyboard 4 x 4 touch keypad
Authentication speed Less than 1 second	Working temperature / humidity 0° - 40°C / 20% - 80%
Performance FAR<0.001% FRR<1%	Power 12V DC

SOFTWARE INTEGRATION

As well as integrating with our partner software platform, we provide SDK software at no charge, to enable easy integration with your particular Time & Attendance or Access Control solution.

FACEID PRODUCT RANGE

SMALL TO MEDIUM ENTERPRISES

Enterprise quality face recognition for a smaller user-base.

Models: FA100 - FT200 - FA600

MEDIUM ENTERPRISES

Face recognition for up to 1000 users.

Models: M500 - F710x

MEDIUM TO LARGE ENTERPRISES

High speed face recognition for >2000 users.

Models: F910 - M2000
